

To SENCO

.....has approached GP with a concern regarding their child
..... date of birth

As the concern relates to the child's behaviour/learning difficulties: before this can be progressed from a health perspective more information is needed from the school/nursery.

Could you please provide the following:

- School / Nursery report & observations
- SENco report (levels of attainment, strategies tried)
- Evidence of My Plan +
- Report from the Advisory Teaching Service who provide specialist support for children with a hearing, visual or physical disability or difficulties with communication, interaction, cognition, learning and behaviour. A referral form and more information is available at www.gloucestershire.gov.uk
- Report from Educational Psychologist

In addition, you may wish to consider:

- referral to the Occupational Therapist (03004216988; <https://www.glos-care.nhs.uk/our-services/children-young-people/children-s-occupational-therapy>)
- parent support course (Webster Stratton or similar)

Could you please send copies all the information to the GP surgery for inclusion on the patient's record? (digital copies if possible)

Once all the information has been collated, the GP will review and consider whether referral to the Paediatrician or CYPS service is appropriate.

Thank you for working with us to support this family.

Yours sincerely

GP
